17. (a) Draft an E-mail to your Head of section requesting him to permit you to appear for the placement drive which is going to be conducted at the other Polytechnic.
(b) Frame THREE 'wh' questions and TWO 'Yes-No' questions from the following passage :

The most beautiful humming birds are found in the West Indies and South America. The crest of the tiny head of one of these birds shines like a sparkling crown of colored light. The shades of color that adorn its breast are equally brilliant. As the bird flights from one flower to another it looks more like a bright flash of sunlight than it does a living being. You ask, why are they called humming birds? It is because they make a soft, humming noise by the rapid motion of their wings—a motion so rapid that as they fly, you can hardly see that they have wings. When you approach the spot where one of these birds has built its nest, you need to be careful. The mother bird will dart at you and try to peck you. Its sharp beak may hurt you.

18. Read the following passage and answer the questions that follow :

Motivation is a multi-faceted force that plays a pivotal role in shaping human behavior and achievements. It can originate from various sources, both internal and external, influencing individuals to strive for success. Understanding the complexities of motivation is crucial for harnessing its power.

Intrinsic motivation stems from personal satisfaction and an inherent desire to engage in an activity. When individuals are intrinsically motivated, they find joy and fulfillment in the task itself, irrespective of external rewards. For instance, someone pursuing a hobby like painting may experience intrinsic motivation, driven by the pure enjoyment of the creative process. The autonomy and personal relevance associated with intrinsic motivation make it a potent force in sustaining long-term commitment.

Conversely, extrinsic motivation is fueled by external factors such as rewards, recognition or consequences. In educational settings, students may be extrinsically motivated by grades or the promise of praise from teachers. While external incentives can provide a temporary boost, their effectiveness may diminish over time. Striking a balance between intrinsic and extrinsic motivators is often key to maintaining sustained enthusiasm and dedication.

Setting goals is a powerful strategy to channel motivation towards specific objectives. Goals create a framework for individuals to direct their efforts and measure progress. In the professional realm, an employee striving for a promotion may set intermediate goals like acquiring new skills or completing projects successfully. The process of setting, pursuing and achieving goals not only propels individuals forward but also enhances their self-efficacy and resilience in the face of challenges.

- (a) Define motivation.
- (b) What is intrinsic motivation?
- (c) Provide an example for the Intrinsic Motivation.
- (d) What do you mean by Extrinsic Motivation?
- (e) How might someone's commitment differ when motivated intrinsically versus extrinsically?
- (f) How does a person get motivated extrinsically? Give an example.
- (g) Why do we maintain a balance between intrinsic and extrinsic motivators?
- (h) How does motivation help us in setting goals?
- (i) What do you mean by the word 'resilience'?
- (j) Pick the word from the passage that would mean as 'to reduce / vanish the significance'.
