BOARD DIPLOMA EXAMINATION, (C-23)
MARCH/APRIL—2025
DME – FOURTH SEMESTER EXAMINATION
MANUFACTURING TECHNOLOGY—II

Time : 3 hours]

[Total Marks : 80

PART—A

3×10=30

Instructions : (1) Answer **all** questions.
(2) Each question carries **three** marks.
(3) Answers should be brief and straight to the point and shall not exceed five simple sentences.

1. Compare up-cut milling and down-cut milling.
2. Name three tool holding devices commonly used in milling machines.
3. State the differences between gear forming and gear generating.
4. What is gear honing?
5. State any three advantages of grinding.
6. State the principle of broaching.
7. What is standardization?
8. Write the differences between precision and accuracy.
9. State the advantages and limitations of modern machining processes.
10. List any three applications of non-conventional machining processes.

PART—B

10×5=50

Instructions : (1) Answer *any* **five** questions.
(2) Each question carries **ten** marks.
(3) Answers should be comprehensive and the criteria for valuation is the content but not the length of the answer.

11. Draw a neat sketch of a column and knee type milling machine and explain the function of each part.
12. Explain any three methods of indexing with examples.
13. Describing gear Hobbing process of manufacturing gears.
14. What are the various methods of grinding? Explain with neat sketch, the principle of centerless grinding.
15. Draw a line diagram of horizontal broaching machine and explain its working.
16. Explain the working of optical comparator.
17. Explain with a neat sketch the working of Co-ordinate Measuring Machine (CMM).
18. Describe the Abrasive jet machining with a legible sketch. State its applications.
